### DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

A/ The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: The oath lacks inventors' signatures.

B/ Claim 7 is objected to because of the following informalities: line 1, "a of blend" should be changed to --a blend of--. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. Claims 1-8 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter: no prior art has been found to teach, disclose, or fairly suggest a tube, comprising a blend of 25-35 weight percent polystyrene having a melt flow index of 7-11 g/10 min and a styrene-butadiene rubber block copolymer having a melt flow index of 10-12 g/10 min; in combination with all of the other limitations in claim 1, claim 6, or claim 7.

4. Blackwelder (US Pat. 5,753,326) and Takagi et al. (US Pat. 5,466,499) are cited of interest.

Blackwelder teaches a tube comprising a blend of 60% weight of a polystyrene having a melt flow index of around 8-10 g/10 min and 40% weight of a styrene butadiene block

Art Unit: 1711

copolymer (see col. 2, ln. 56-62). Takagi teaches a tube comprising a blend of 1-95% weight of a polystyrene having a melt index of at most 20 and 5-40% weight of a styrene-butadiene block copolymer (see col. 4, ln. 32-53; Examples 3-5; col. 13, ln. 44-54).

However, neither reference recognizes the criticality of the blend containing specifically 25-35%, 28-32%, or 29-5-30.5% weight of polystyrene or that the styrene-butadiene rubber block copolymer would have a melt flow index of 10-12 g/10 min; in combination with all of the other limitations in claim 1, claim 6, or claim 7.

5. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao T. Tran whose telephone number is 703-306-5698. The examiner can normally be reached on Monday-Friday, from 8:30 a.m. - 5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 703-308-2462. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
